## PROJECT OVERVIEW

The H Street Bridge NE (Hopscotch Bridge), constructed in 1977, is located immediately north of Union Station, and links North Capitol Street to 3<sup>rd</sup> Street NE. The bridge spans 1,442 feet over 1<sup>st</sup> Street, NE, the Metro red line tracks, Amtrak tracks and platforms, and 2<sup>nd</sup> Street, NE.

The purpose of the project is to replace the bridge to match its current configuration and operations for pedestrian, vehicle, bus and transit while not precluding future adjacent projects. The replacement of the bridge is needed to address deficiencies identified in the 2018 Bridge Inspection Report.

A phased approach to the reconstruction will allow the bridge to remain open to vehicles and pedestrians throughout the project with short term closures limited to off-peak periods only. Vehicular and intercity bus access into the Union Station parking garage will be maintained as a part of this phased approach. The Union Station streetcar stop will be closed throughout construction with streetcar operations along H Street terminating one stop earlier at 3<sup>rd</sup> Street. Construction will be closely coordinated with Amtrak and Metro rail operations beneath the bridge to minimize impacts to the travelling public.

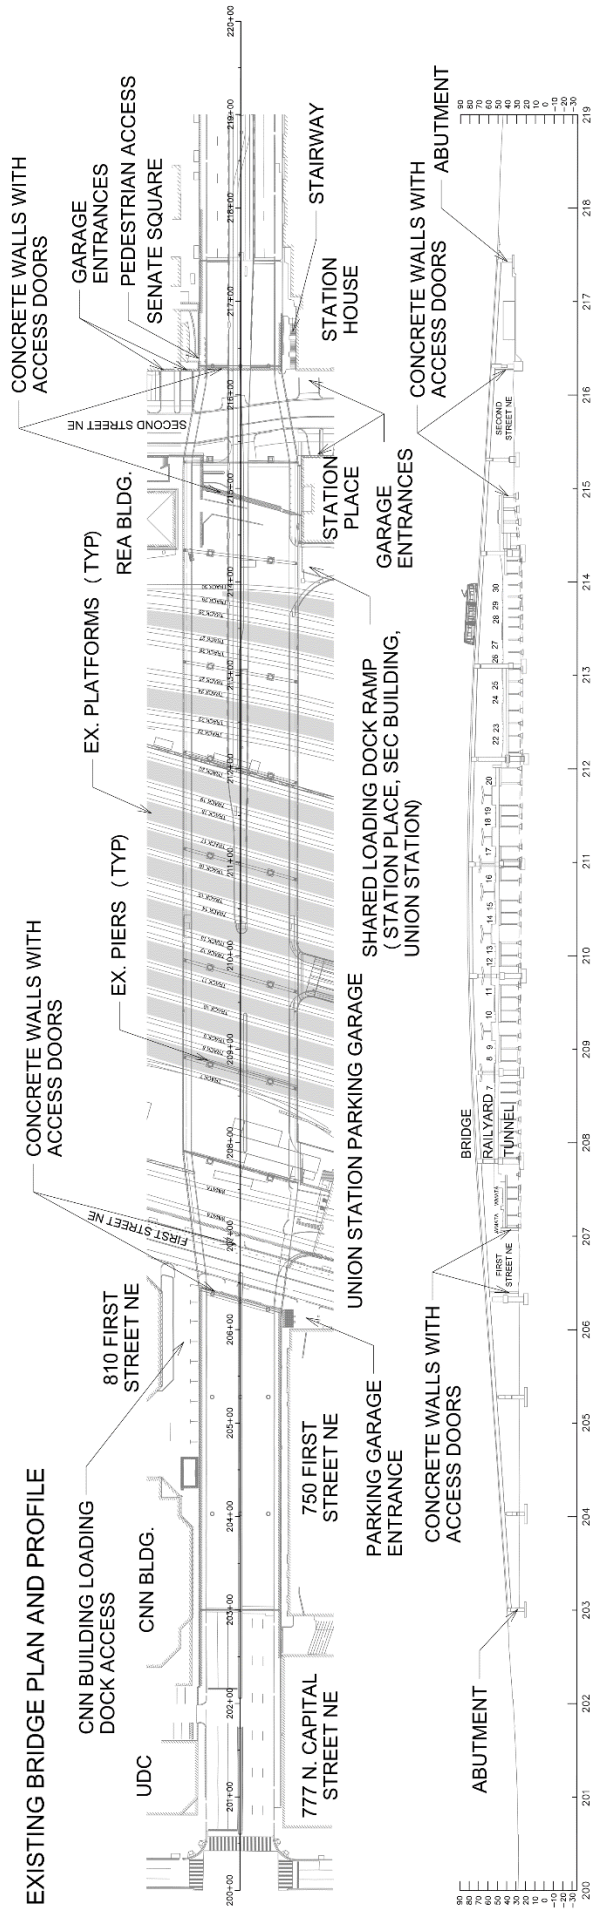

**TOTAL PROJECT COST:** \$225 Million

## PROJECT DELIVERY\*:

Complete NEPA and Preliminary Engineering	4 <sup>th</sup> Quarter 2019
Issue Design-Build RFQ	1 <sup>st</sup> Quarter 2020
Anticipated Contract Award	1 <sup>st</sup> Quarter 2021
Project Completion	2025

\*(subject to change)
